

EXPERIMENT 6

LAYOUT AND COLOUR SCHEME EVALUATION FOR MOBILE APP

NAME: Merlyn Sosa Saju

REGISTER NUMBER: 240701309

AIM:

To experiment with different layouts and color schemes for a mobile application and collect user feedback on aesthetics and usability.

PROCEDURE:

Step 1: Install GIMP

1. Download and install GIMP.
2. Open the application after installation.

Step 2: Create a New Project

1. Go to **File** → **New**.
2. Set the canvas size (e.g., 1080×1920 pixels for mobile UI).

Step 3: Design the Base Layout

Create Sections

1. Use the **Rectangle Select Tool** to create:
 - Header
 - Content Area
 - Footer
2. Fill sections with colors using the **Bucket Fill Tool**.

Add UI Elements

- Use the **Text Tool** for headings and labels.
- Use shape or brush tools to create:

- Buttons
- Input fields
- Navigation elements

Organize Layers

1. Keep each UI element on separate layers.
2. Name layers clearly such as:
 - Header
 - Button
 - Input Field

Step 4: Experiment with Colors

1. Duplicate the layout to create multiple versions.
2. Change colors using:
 - Bucket Fill Tool
 - Colorize Tool
3. Export each version as PNG:
 - Layout1.png
 - Layout2.png

Step 5: Collect User Feedback

1. Create a feedback form using:
 - Google Forms
 - Microsoft Forms
2. Share the layout designs with users.
3. Ask users about:
 - Visual appearance
 - Color preference
 - Ease of use

4. Analyze responses to identify the best design.

Step 6: Refine the Design

1. Improve the layout based on user feedback.
2. Adjust colors, spacing, or UI elements if required.
3. Perform final testing to ensure usability and design quality.

OUTPUT:

RESULT

Users preferred layouts with organized content and soft color schemes. Attractive visuals and proper color combinations improved usability and user experience
