

EXPERIMENT 8

STORYBOARD DESIGN FOR FOOD DELIVERY MOBILE APP

NAME: Merlyn Sosa Saju

REGISTER NUMBER: 240701309

AIM:

To create storyboards representing the user flow for a food delivery mobile application.

PROCEDURE:

Step 1: Define the User Flow

Identify Main Screens

List important app screens such as:

- Home
- Menu
- Cart
- Checkout
- Order Confirmation

Map the User Journey

Understand how users move through the app:

Home → Menu → Add to Cart → Checkout → Order Confirmation

Step 2: Create Storyboards in Balsamiq

Step 1: Install Balsamiq

1. Download and install Balsamiq.
2. Open the application and create a new project.

Step 2: Add Wireframe Screens

Create separate wireframes for:

- Home Screen
- Menu Screen
- Cart Screen
- Checkout Screen
- Order Confirmation Screen

Step 3: Design Each Screen

Use components to add:

- Buttons
- Text fields
- Images
- Navigation elements

Step 4: Organize the Navigation Flow

1. Arrange screens in sequence.
2. Connect screens with arrows to represent user actions and navigation.

Example Screens for Food Delivery App

Home Screen

- Search bar for restaurants
- Cuisine categories

Menu Screen

- Food item list with images and prices
- “Add to Cart” buttons

Cart Screen

- Selected items with quantity and total price
- Checkout button

Checkout Screen

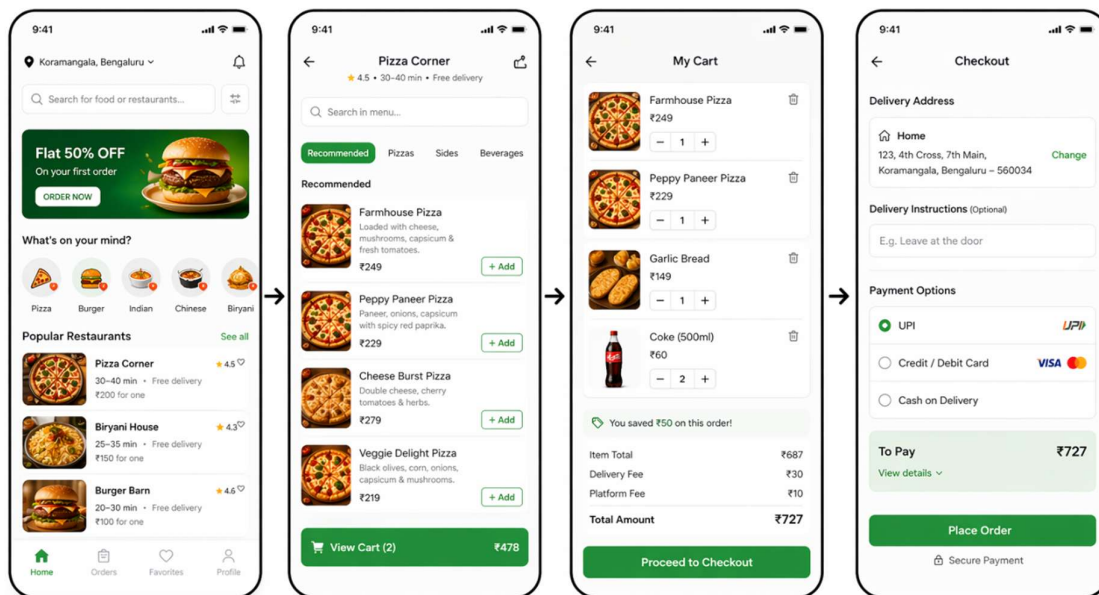

- Delivery address form

- Payment options
- Place Order button

Order Confirmation Screen

- Order summary
- Estimated delivery time

OUTPUT:

RESULT

The storyboard successfully represented the complete user flow of the food delivery application and improved understanding of user interaction and navigation.
